10x25A Compact Telescope

This compact telescope features 10x magnification and a 25mm objective lens. It is designed for clear and bright viewing of distant objects during outdoor activities.

Overview

Professional Compact Optics

The 10x25A Compact Telescope is a versatile observation tool engineered for clarity, portability, and performance. Featuring a 25mm objective lens, it delivers bright, high-contrast imagery, while its 10x magnification ensures detailed viewing of distant targets. Designed for durability, this lightweight optic is an ideal companion for outdoor activities including bird watching, hiking, and live sporting events.

Technical Specifications

Magnification	10
Objective Lens Diameter	25 mm
