Overview

Versatile 11-Ton Telescopic Crane Loader

The HNT-110 is a high-efficiency loading and unloading machine that combines the capabilities of a crane, loader, and forklift into a single robust chassis. Featuring a three-stage quadrilateral telescopic boom and a quick-change device, it is designed for wide adaptability in factories, docks, and construction sites. This machine excels at specialized tasks like lifting stone slabs from containers while remaining versatile enough for general crane and material handling operations.

Performance Metrics

Key Performance Metrics

11000 kg
Rated Load

10300 mm
Max Lifting Height

13000 kg
Operating Weight

Chassis & Drivetrain

Drive System

- Front-wheel drive with rear-wheel steering
- Hydro-mechanical transmission
- Two-speed forward and two-speed reverse
- Full hydraulic power steering
- Electronic off-axle function for 2WD/4WD switching
- Rigid suspension system

Technical Specifications

Operational Parameters

Item	Parameter	Remark
Rated Load	d11000kg	Maximum capacity
Operating Weight	13000 kg	Standard configuration
Main Hook Max Height	7605 mm	From hook to ground
Full Extended Boom Height	10300 mm	Maximum vertical reach

Hydraulics & Braking

Hydraulics & Braking

- Dual-pump combined hydraulic system for reduced energy consumption
- Air-over-oil type drum brakes
- Electronic handbrake for improved sensitivity
- Coaxial flow amplification steering system

Operator Comfort & Safety

Operator Environment

Wide View Cabin, Air Conditioning, Joystick Control, Adjustable Air Seat, Radio, Low Noise Sealing, Maintenance-Free Battery

Applications

Target Industries

Logistics • Construction • Freight Yards • Docks & Ports • Forestry • Stone Handling • Utility Installation
