

11000 kg Vehicle Recovery Snatch Strap

This high-strength snatch strap is designed for vehicle recovery. It is constructed from durable woven material with reinforced loops for secure connections and is rated for a maximum load capacity of 11000 kg.

Product Overview

Professional Vehicle Recovery Solution

This 11000 kg vehicle recovery snatch strap is designed for high-performance off-road and professional recovery applications. Manufactured from 100% durable nylon, it provides a 20% extension rate to effectively harness kinetic energy during vehicle extraction. Featuring a width of 75mm and a length of 9 meters, it offers the optimal balance of strength and flexibility required for heavy-duty recovery operations.
