

1100W Demolition Hammer with 25 J Impact Force

This demolition hammer delivers a powerful 25 J impact force. It features a compact design and comfortable handle for easy operation.

ADDITIONAL IMAGES

Product Overview

Engineered for efficient material removal in demanding environments.

Heavy-Duty Demolition Performance

This 1100W demolition hammer is engineered for high-impact tasks including breaking and chipping concrete, masonry, and asphalt. Designed for professional construction and renovation, it features a robust 37mm cylinder and a specialized anti-vibration control system to enhance user comfort during extended operation. The tool's leakproof structure and durable iron head ensure long-lasting reliability on demanding job sites.

Performance Metrics

High-performance motor designed for concrete breaking and chipping.

1100 W

Input Power

25 J

Impact Force

37 mm

Cylinder Size

Technical Specifications

Electrical Requirements

| Parameter | Value |
|-------------------|-------|
| Voltage | 220V |
| Frequency | 50Hz |
| Rated Input Power | 1100W |

Design & Durability

Durable build quality optimized for professional job site conditions.

Build Features

- Anti-abrasion iron head for enhanced durability
- Leakproof structure to prevent oil leakage
- Oil seal cover for internal component protection
- Quick-change carbon brush design
- Ergonomic handle for improved control

User Comfort

Vibration Control

Yes

Applications

Precision control for versatile demolition and chiseling tasks.

Suitable Materials

Concrete, Masonry, Asphalt, Steel, Wood
