

110W Industrial Sirocco Fan

This industrial sirocco fan operates at 110W, delivering an airflow of 12m³/min. It is designed for ventilation and air circulation in industrial and commercial settings.

Overview

Industrial-Grade Ventilation Solution

The 110W Industrial Sirocco Fan is a high-performance centrifugal blower designed for consistent and powerful airflow in demanding environments. Featuring robust construction and a protective grille, it is engineered for efficient air movement in HVAC systems, exhaust setups, and spot cooling applications. This single-phase fan ensures reliable, long-lasting performance with quiet operation, making it ideal for professional workshops and manufacturing facilities.

Performance Metrics

Key Performance Metrics

110 W

Output Power

14.4 CMM

Max Air Flow (60Hz)

27 mmAq

Max Static Pressure

1450 RPM

Rated Speed

Technical Specifications

Electrical & Operational Data

Voltage (V)	Frequency (Hz)	Current (A)	Air Flow (CMM)	Pressure (mmAq)
110	60	2	14.4	27
220	60	1	14.4	27
220	50	1.1	12	19

Physical Dimensions

Unit Dimensions

- Width: 243mm
- Height: 225mm
- Depth: 253mm
- Net Weight: 9kg
- Shipping Volume: 0.04m³

Compliance & Usage

Certifications

CE • Low Voltage Directive 2006/95/EC • EN60334-1:2004 • EN60204-1:2006

Applications

Ventilation, HVAC Systems, Exhaust Systems, Spot Cooling, Industrial Air Circulation

Product Features

Model Identifier

CY150DM

Customization

Yes
