

115L Compressor Beverage Cooler with Glass Door

This beverage cooler uses a compressor for efficient cooling. It features a glass door for displaying the contents.

Product Overview

Professional 115L Compressor Beverage Cooler

This high-capacity 115L beverage cooler is engineered with a powerful compressor system for fast and stable cooling, making it ideal for high-traffic commercial environments like hotels and restaurants. The transparent glass door provides excellent product visibility to drive impulse purchases while maintaining optimal internal temperatures. Designed for durability and performance, this unit supports OEM customization to meet specific branding and functional requirements for international B2B buyers.
