Product Overview

Heavy-Duty Air Suspension System

This 11T capacity truck air suspension system is engineered to provide superior ride comfort and vehicle stability for heavy-duty applications. Utilizing a durable leaf spring design combined with advanced air spring technology, it effectively absorbs road shocks and minimizes vibrations. This robust assembly is built to withstand demanding transport conditions while ensuring consistent performance.

Technical Specifications

Load Capacity

11 T

Load Capacity

Key Components

- Black mounting bracket
- Red connecting structure
- Air spring assembly
- Integrated pneumatic tubing

Suspension Design

Leaf spring air suspension hybrid

Application

Compatible Vehicles

Trucks, Trailers, Heavy-Duty Vehicles
