Overview

Professional Grade Keyless Drill Chuck

This 1/2" (13mm) keyless drill chuck is engineered for high-performance applications, featuring a patented enhanced ratchet locking system for superior bit retention. It incorporates audible 'Click' technology and 'Anti-Lock' mechanisms to ensure reliable operation under severe drilling conditions. Designed for both DC portable drills and hammer drills, its compact metal sleeve construction makes it ideal for modern high-torque professional tools.

Technical Highlights

Core Specifications

13 mm

Max Capacity

0.5 inch

Max Capacity

51 mm

Minimum Length

Advanced Technologies

Locking Mechanism	Enhanced Ratchet Locking System for high bit-holding capability
User Feedback	Audible and tactile 'Click' technology for confirmed tightening
Safety Feature	Anti-Lock technology prevents locking open at maximum capacity

Design & Build

Sleeve Construction

Single Metal Sleeve • Compact Design

Jaw Material	Standard (Carbide Jaws optional)
