

12 Amp Magnetic AC Contactor

Contactors facilitate remote control of electric motors and compensation and heating systems via cable. These devices safeguard instruments and equipment from overload currents through the utilization of thermal relays.

Overview

Professional Magnetic AC Contactor

The CJX2-12 magnetic AC contactor is a robust electrical switching device designed for reliable control of electric motors, lighting, and compensation systems. Engineered for industrial and commercial environments, it ensures safe power management with built-in overload and short-circuit protection capabilities. Its compact, durable construction allows for easy integration into existing control panels, minimizing installation time and operational downtime.

Technical Specifications

Rated Current

12 A

Rated Current

Standards Compliance

IEC 60947-4-1

Rated Voltage

Up to 660V AC

Operating Frequency

50Hz, 60Hz

Physical Dimensions

Product Dimensions

Dimension	Measurement
Height	76 mm
Width	66 mm
Depth	46 mm

Features

Suitable Applications

- Electric motor control
- Lighting systems
- Compensation systems
- Heating systems
- Capacitor switching

Safety & Protection

- Overload protection
- Short-circuit protection
- Thermal relay compatible
