

12-Channel Stereo Audio Mixer with EQ and Echo Effects

This 12-channel stereo mixer is designed for professional audio applications. It offers individual gain, EQ, and pan controls, along with a graphic equalizer and echo effects.

Overview

Professional Audio Control

The DFX.12 is a versatile 12-channel stereo mixer engineered for both studio recording and live performance environments. It combines ultra-low noise circuitry with precise 3-band equalization and integrated digital echo effects to deliver professional-grade sound quality. Designed for reliability, this unit features a robust build, phantom power for condenser microphones, and comprehensive monitoring capabilities to meet the demands of audio professionals.
