

12-Inch 150W Active Subwoofer

This active subwoofer enhances audio systems with deep, powerful bass. The 12-inch loudspeaker and 150W amplifier ensure accurate and impactful low-frequency reproduction.

Overview

High-Performance Bass Enhancement

This 12-inch active subwoofer is engineered to deliver deep, impactful low-frequency reproduction for demanding audio setups. With a robust 150W amplifier and a precision-tuned driver, it provides the power and accuracy needed to elevate home theater and music listening experiences. Its optimized enclosure design ensures clean, distortion-free bass performance across a variety of applications.
