

12-Inch Adjustable Basin Wrench

This 12-inch adjustable basin wrench is designed to reach fasteners in tight, hard-to-reach places. It is used for installing and repairing faucets and drains.

Product Overview

Professional Basin Wrench

This 12-inch adjustable basin wrench is an essential tool for professional plumbing maintenance, specifically designed for accessing tight spaces under sinks and behind toilets. Featuring a 180-degree pivoting head and serrated, self-adjusting jaws, it provides a secure grip on nuts and pipe fittings ranging from 8mm to 22mm. The sliding T-shape handle design ensures optimal leverage and comfort, making it ideal for the installation and removal of faucet and fill valve nuts.

Technical Specifications

Material	High carbon steel
Finish	Mirror finish
Weight	500 g
