

# 12-inch Marine Chartplotter with GPS

This marine chartplotter is designed for navigation and situational awareness. It features a 12-inch display and supports various marine network devices for integration with radar and sonar.

## Product Overview

### Professional Marine Navigation Center

This 12-inch chartplotter serves as a comprehensive nerve center for your marine navigation network. Featuring a high-resolution 12.1-inch XGA display, it provides crisp, video-quality visuals for all your mapping, radar, and sonar needs. Designed for both recreational and professional use, this unit offers robust construction and seamless integration with external marine instruments.
