

12-Panel Sliding Table Saw

This high-precision panel saw is designed for woodworking applications. It features a sliding table for accurate cutting of large panels, along with adjustable fences and a dust collection port.

Overview

High-Precision Woodworking Solution

The 12-Panel Sliding Table Saw is a robust solution designed for high-precision woodworking applications. It features a stable construction that ensures durability during heavy-duty use, while the integrated sliding table allows for accurate and efficient cutting of large panels. With built-in safety features like a blade guard and emergency stop, it is an ideal choice for professional workshops demanding repeatable, precise results.

Design & Construction

Build Quality

- Robust construction for maximum stability
- Integrated sliding table for large panel handling
- Adjustable fences for precise measurements
- Repeatable cut stops

Safety & Environment

Safety Systems

Blade Guard • Emergency Stop Switch • Dust Collection Port

Technical Specifications

Primary Application	Woodworking and Panel Cutting
Precision Level	High-precision with adjustable stops
