

120 HP 4WD Farm Tractor

This 120 HP 4WD farm tractor features a direct injection, water-cooled engine. The gearbox has 10 forward and 10 reverse gears.

Overview

The QLN1204B is a robust, versatile tractor built for demanding agricultural tasks.

Robust Agricultural Power

The 120 HP 4WD tractor is a versatile machine engineered for demanding agricultural tasks including plowing, tilling, and heavy-duty hauling. Featuring a reliable 4-cylinder engine and a precise F10+R10 shuttle shift transmission, it delivers consistent performance and maneuverability in the field. Designed with both efficiency and operator comfort in mind, this tractor is an ideal solution for increasing productivity on modern farms.

Engine & Performance

Rated Power

88.2 kW
Rated Power

2200 r/min
Rated Speed

Engine Configuration: Directly Injection Vertical Water Cooled 4-stroke

Number of Cylinders: 4

Transmission & Hydraulics

Transmission: F10+R10 Shuttle Shift

Clutch System: 12in. Dual-function, independent, dry clutch

PTO Speed: 540 rpm, 760 rpm

Dimensions & Build

Dimensions (LxWxH): 4385 x 1980 x 2830 mm

Dry Mass (with cab): 3480 kg

Fuel Tank Volume: 100 L
