Overview

Professional Compaction Performance

The 1200kg Hydraulic Vibratory Road Roller is a high-performance machine engineered for professional road construction, repair, and maintenance. Featuring a powerful engine and a sophisticated hydraulic drive system, it ensures stable and efficient compaction across soil, gravel, and asphalt surfaces. The unit is designed with a focus on durability, including a rust-proof water tank and world-class hydraulic components to minimize downtime.

Technical Specifications

Working Weight	1200 kg
Exciting Force	22 KN

Key Components

Hydraulic System

- American SAUER pump
- American SAUER vibrating motor
- Danmark Donfoss driving motor

Engine	Honda GX390
--------	-------------

Features

Warranty

1 Year Warranty

Water Spraying System	Intermittent spray with plastic, rust-proof tank
