

1200W Cyclone Filtration Vacuum Cleaner

This vacuum cleaner is equipped with a 1200W motor, providing strong suction for effective dirt and dust removal. Its cyclone filtration system separates dust and debris, preventing clogging and maintaining consistent suction power.

Overview

High-Performance Cleaning Solution

The 1200W Cyclone Filtration Vacuum Cleaner is engineered for efficient and thorough maintenance of various surfaces. Featuring advanced cyclone filtration, it effectively separates dust and debris to maintain consistent suction power without clogging. Its lightweight, ergonomic design and versatile attachment set make it an ideal choice for professional-grade cleaning tasks.
