Product Overview

Precision Performance

This 1200W precision track saw is engineered for demanding woodworking and construction tasks, offering consistent power and accuracy. The integrated track system facilitates straight, splinter-free cuts on large panels and sheets. Featuring an aluminum die-casting base and versatile bevel adjustments, it provides a stable and professional solution for carpentry and fabrication.

Technical Specifications

Power Performance

1200 W

Power Output

5200 rpm

No-Load Speed

Blade Specifications

- Diameter: 165mm
- Arbor Size: 20mm
- Thickness: 2.6mm
- Teeth Count: 24 TCT

Cutting Depth Table

Angle	Depth
90°	56mm
45°	42mm

Features & Equipment

Included Components

4pcs Guide Rails, 6pcs Connector Bars, 2pcs Hex Keys, 2pcs G Clamps, Dust Sucking Adapter

Construction Material

Aluminum die-casting
