

120mm Axial Fan for Industrial Cooling

This 120mm x 120mm x 25mm axial fan is designed for cooling in machinery and industrial settings. It is commonly used for thermal management in electronic equipment, industrial control panels, and other applications where heat dissipation is critical.

Product Overview

Industrial Cooling Performance

This 120mm axial fan is engineered for reliable thermal management in demanding industrial environments. Featuring a robust 7-blade impeller design, it efficiently dissipates heat in control panels and electronic enclosures. The standard form factor ensures compatibility with a wide range of industrial machinery cooling applications.

Technical Specifications

Dimensions

120 mm

Width

120 mm

Height

25 mm

Depth

Impeller Blades

7

Power Source

DC

Design & Construction

Frame Material

Durable Plastic

Mounting

Standard mounting holes, Easy installation

Applications

Primary Applications

- Industrial control panels
- Electronic equipment cooling
- Machinery thermal management
