

120tRH Heavy-Duty Hydraulic Scissor Lift Platform

This heavy-duty scissor lift platform is designed for demanding lifting applications. It utilizes hydraulic cylinders to provide vertical movement for the central chamber during repair and maintenance.

Product Overview

Heavy-Duty Maintenance Solution

The 120tRH is a specialized hydraulic scissor lift platform engineered for demanding industrial environments. It provides precise vertical movement via hydraulic cylinders, allowing maintenance personnel to access hard-to-reach areas safely. Built with a robust steel frame and a mobile wheeled base, this unit is an essential tool for complex repair tasks and material handling.

Technical Specifications

Lifting Capacity

120 t

Load Capacity

Movement Mechanism

Hydraulic Scissor Lift

Safety & Compliance

Integrated Safety

Safety Barriers, Emergency Stop Controls, High-Visibility Markings

Operational Details

Industrial Applications

- Central chamber maintenance
- Refractory restoration
- Vertical positioning for industrial repairs
- Material handling
