Overview

Sustainable Outdoor Illumination

This 120W solar street light provides an efficient and sustainable solution for outdoor lighting needs, eliminating the need for grid electricity. Designed for durability and performance, the system integrates high-efficiency solar panels, long-lasting battery storage, and bright LED arrays. It is an ideal choice for streets, parking lots, and pathways, offering cost-effective and environmentally friendly operation.

Technical Specifications

System Components

- High-efficiency solar panel
- Durable energy storage battery
- High-performance LED array
- Robust mounting hardware
