

1250ml Coke Bottle Dual Cavity Mold

This dual cavity mold is designed for producing 1250ml Coke bottles. The precision-engineered tool ensures accurate shaping and consistent dimensions for high-volume manufacturing.

Product Overview

Precision Dual Cavity Mold for 1250ml Bottles

This dual cavity mold is engineered specifically for the high-volume production of 1250ml beverage bottles. Designed with precision and durability in mind, it ensures consistent dimensions and accurate shaping for every unit produced. Its robust construction supports an extended operational lifespan, making it a reliable solution for industrial beverage container manufacturing.

Technical Specifications

Number of Cavities	2
Bottle Volume	1250 ml
Primary Application	Beverage Container, High-Volume Manufacturing

Performance Features

Key Benefits

- Precision-engineered for accurate shaping
- Consistent dimensions for high-volume production
- Durable construction for extended lifespan
- Reliable performance in industrial settings
