

# 125cc Four-Stroke Single Cylinder Engine

This 125cc four-stroke engine is a single-cylinder engine commonly found in scooters and ATVs. It has a forced air-cooled system and provides a balance of power and fuel efficiency.

## Overview

### Reliable 125cc Four-Stroke Engine

The 125cc four-stroke single-cylinder engine is a versatile power unit designed for scooters, ATVs, and small recreational vehicles. Featuring a forced air-cooled system, this engine is engineered for a balance of consistent power output and fuel efficiency. Its compact design and robust construction ensure ease of maintenance, making it an ideal choice for urban transportation applications.

## Technical Specifications

Engine Type	Four-stroke, single cylinder
Displacement	125 cc
Cooling System	Forced air-cooled

## Performance & Features

### Suitable Applications

- Scooters
- ATVs
- Small recreational vehicles
- Urban transportation

### Key Features

Automatic Transmission, Electric Starter, Carburetor System
