

# 125cc Four-Stroke Utility Motorcycle

This four-stroke motorcycle is designed for general transportation and utility purposes. It features a single-cylinder engine and a standard chassis with telescopic fork front suspension and dual shock absorbers at the rear.

## Overview

### Reliable Utility Transportation

The 125cc Four-Stroke Utility Motorcycle is engineered for dependable daily transportation and light utility tasks. Featuring a robust single-cylinder, air-cooled engine, this motorcycle balances fuel efficiency with ease of maintenance. Its practical design includes a rear luggage rack and a durable chassis, making it an ideal solution for urban commuting and short-distance transport needs.
