Overview

Engine Performance and Design

This 125cc motorcycle engine is engineered with a specialized balancing mechanism designed to significantly reduce vibrations, ensuring a smoother and more controlled riding experience. Built for reliability in the 100cc-125cc category, it offers an optimal balance between power output and fuel efficiency. The design prioritizes durability for daily use, making it an excellent choice for general commuting applications.

Technical Specifications

Engine Displacement	125 cc
Engine Type	Balancing Engine

Design and Comfort

Rear Cargo Features

- Reinforced double shelf
- Strong bearing capacity
- Tail lamp protection function

Seat Design	Thickened and widened for enhanced comfort and durability
