

125cc Sport Motorcycle

This sport motorcycle has a 125cc, liquid-cooled, single-cylinder engine. It features a tubular steel frame, upside-down front forks, and disc brakes.

Overview

Sporty Performance for Entry-Level Riders

This 125cc sport motorcycle is engineered for agility and performance, featuring a 4-stroke, air-cooled engine designed for reliable daily use. With a lightweight trellis frame and precision-tuned suspension, it offers a balanced ride suitable for navigating urban environments or learning sport-style handling. The inclusion of digital instrumentation and high-quality components ensures a modern riding experience for new enthusiasts.
