

125mm Angle Grinder

This robust power tool is designed for grinding, cutting, and polishing various materials. It features a powerful motor, delivering high performance and efficiency, and is equipped with a 125mm grinding wheel.

Product Overview

Professional Performance and Reliability

The 125mm Angle Grinder is a robust and reliable power tool designed for versatile grinding, cutting, and polishing tasks. Engineered for high performance, it features a powerful motor that ensures efficiency during demanding applications. Its ergonomic design prioritizes user comfort, helping to reduce fatigue during extended use. This tool is an ideal solution for metalworking, construction, and various professional projects.

Technical Specifications

Wheel Diameter	125 mm
Wheel Capacity (Imperial)	5 in
Model Number	JD3106C

Features & Safety

Key Features	Spindle Lock, Wheel Guard, Ergonomic Design
--------------	---

Applications

Suitable Applications

- Metalworking
- Construction
- DIY Projects
- Grinding
- Cutting
- Polishing
