

125mm Orbital Sander

This 125mm sander is a power tool designed for sanding surfaces. It operates with an orbital motion, providing a smooth finish and is suitable for various woodworking and finishing applications.

Product Overview

Professional Orbital Sander

This 125mm orbital sander is an essential power tool designed for efficient surface preparation and smoothing. Featuring an ergonomic handle for operator comfort and a dedicated dust collection system, it minimizes airborne particles during use. It is engineered for consistent performance across various woodworking and finishing applications.

Technical Specifications

Sanding Pad Diameter	125 mm
Motion Type	Orbital

Features

Key Features

- Ergonomic handle design
- Integrated dust collection bag
- Orbital motion for smooth finish

Suitable Applications	Woodworking, Surface Finishing
