Overview

Eco-Friendly 12KG Washing Solution

This 12KG capacity washing machine leverages advanced active oxygen, ultrasonic, and electrolysis technologies to achieve deep decontamination and sterilization without the need for chemical detergents. Designed for modern households, it features an intelligent anti-winding system, quiet operation, and multiple specialized washing programs for various fabric types. Its energy-efficient design, combined with durable stainless steel components, ensures a hygienic and gentle laundry experience that is safe for the entire family, including infants.

Technical Specifications

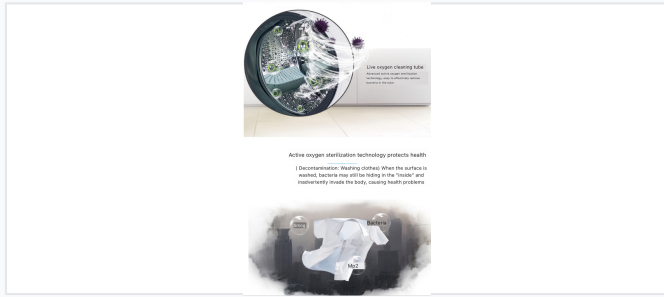

High-efficiency pure copper motor ensures quiet operation and long service life.

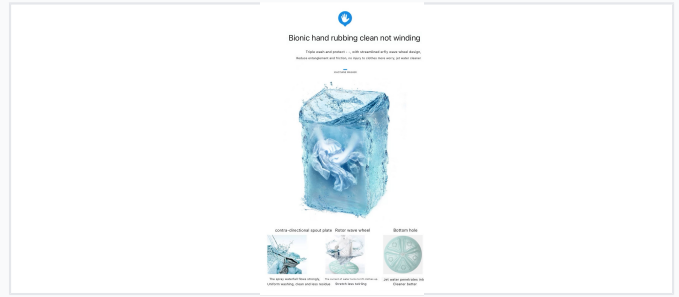

Waterproof Rating
IPX4

Washing Capacity	12 kg
Work Rate	420 W
Dimensions	975mm x 580mm x 570mm
Rated Voltage/Frequency	220V~ / 50Hz

Core Features

Active oxygen sterilization technology protects health by eliminating hidden bacteria.

Bionic hand rubbing clean action prevents winding and reduces friction.
