Product Overview

Professional 12L Air Fryer Oven

This high-capacity 12-liter air fryer oven is engineered for versatile, efficient home cooking. Featuring advanced top-heating elements and a convection system, it cooks up to 20% faster than traditional ovens while promoting healthier, oil-free meals. Its dual-tempered glass window and 360-degree rotation function allow for precise monitoring and uniform cooking across all three interior rack levels.

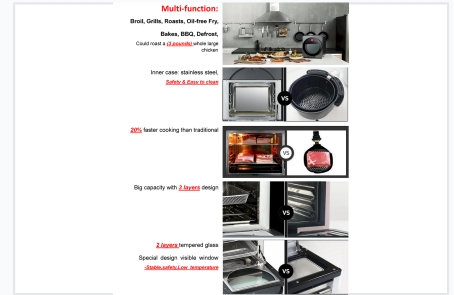

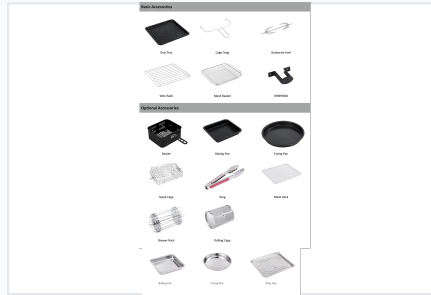

Technical Specifications

Power Rating	1600 W
Total Capacity	12 L
Temperature Range	50~220 (130~440)
Supported Voltage	120V, 220~240V

Key Features

Digital control interface with 16 preset cooking modes

Versatile cooking: from rotisserie chicken to dehydrating

Advanced Functions

- 360-degree rotation
- 3D visualizing glass window
- 3-layer rack system
- Top convection system
- Double-tempered glass door

Preset Modes

16

Materials and Construction
