

12mm Feeder for SMT Pick and Place Machines

This 12mm feeder unit is designed for SMT pick and place machines. It ensures reliable component feeding during the PCB assembly process.

Product Overview

Precision-engineered 12mm feeder for high-volume electronics assembly.

High-Precision 12mm SMT Feeder

This 12mm feeder is a critical component designed for automated electronics assembly. Engineered for high-volume production, it ensures precise and reliable component feeding for advanced pick and place systems. The unit is available in original new or replacement configurations to support diverse manufacturing requirements.

Compatibility

Compatible Machine Series

CP33, CP40, CP45, CP45FV, CP60, NEO

Technical Specifications

Available Feeder Series

- 8*2mm
- 8*4mm
- 8mm
- 12mm
- 16mm
- 24mm
- 32mm
- 44mm
- 56mm

Feeder Width

12 mm
