Overview

High-Performance Gel Energy Storage

This advanced 12V 100Ah Gel battery is engineered for reliable home power systems, featuring an exclusive patented design with an integrated electronic chip for real-time capacity monitoring. Equipped with an LCD display, it provides users with enhanced control and visibility into their power storage status. Designed for deep cycle applications, this non-spillable battery ensures long-term durability and safety for essential household electricity needs.

Technical Specifications

| | |
|----------------------|--------------|
| Nominal Voltage | 12 V |
| Capacity | 100 Ah |
| Cycle Use Voltage | 14.5 - 14.9V |
| Floating Use Voltage | 13.6 - 13.8V |
| Initial Current | 30 A |

Features

| | |
|--------------|--|
| Key Features | Deep Cycle, Non-spillable, LCD Display, Real-time Capacity Detection, Integrated Electronic Chip |
|--------------|--|

Safety & Compliance

Safety Guidelines

- Risk of fire, explosion, or burns
- Do not short the system terminal
- Do not disassemble, heat above 40°C, or incinerate
- Keep LCD screen away from hard objects
- Handle system alarms timely
