

12V 100Ah Gel Lead-Acid Battery for Solar/Wind Systems

This 12V 100Ah gel battery is designed for solar and wind energy storage. It features valve-regulated lead-acid (VRLA) technology for maintenance-free operation and enhanced safety.

Product Overview

Reliable Renewable Energy Storage

This 12V 100Ah gel lead-acid battery is specifically engineered for high-performance solar and wind energy storage systems. Utilizing advanced gel electrolyte technology, this valve-regulated lead-acid (VRLA) battery ensures maintenance-free operation and enhanced safety for off-grid power solutions. Its robust design makes it an ideal choice for reliable energy storage in renewable energy applications.

Technical Specifications

Nominal Voltage

12 V

Nominal Voltage

Rated Capacity

100 Ah

Rated Capacity

Model Number

6-CNF(J)-100

Physical Dimensions

Dimensions and Weight

Metric	Value
Length	330 mm
Width	174 mm
Height	330 mm
Weight	28 kg

Compliance and Standards

Certifications

ISO9001, ISO4001, CE
