

12V 10Ah Sealed Lead-Acid Battery for Electric Bikes

This sealed lead-acid battery is designed for electric bicycles and appliances. It has a 12V voltage and 10Ah capacity at a 2-hour discharge rate.

Overview

Reliable Power for Electric Mobility

This sealed lead-acid battery is engineered specifically for electric bicycles and similar electric appliances. Featuring a 12V voltage and 10Ah capacity, it offers a consistent power supply for daily commuting needs. Its maintenance-free design ensures long-term reliability and ease of use for various electric mobility applications.

Technical Specifications

Battery Chemistry

Sealed Lead-Acid • Maintenance-Free

Rated Voltage	12 V
Capacity	10 Ah
Discharge Rate	2-hour rate

Applications

Primary Applications

- Electric Bicycles
- Electric Appliances
