

# 12V 130A Automotive Alternator for Ford

This 12V 130A alternator is designed for Ford vehicles. It provides reliable power to the battery and electrical system.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Automotive Alternator

This high-output alternator is engineered to provide reliable and efficient power delivery for automotive electrical systems. Designed as a direct replacement for original equipment, it features robust construction and enhanced cooling capabilities to withstand demanding operating conditions. With a 130A output, it is an ideal solution for vehicles requiring stable power, including those with increased electrical loads like auxiliary lighting or aftermarket electronics.

## Technical Specifications

### Amperage Output

**130 A**

Output Current

### Voltage

12 V

### Key Features

High-Efficiency Rectifier, Durable Bearings, Enhanced Cooling, OEM Direct Replacement

## Compatibility

### Application

Automotive
