

12V 150Ah Tubular Gel Battery

This 12V 150Ah tubular gel battery utilizes advanced gel electrolyte technology for enhanced performance and durability. The maintenance-free design eliminates the need for regular water addition, making it suitable for demanding applications.

Product Overview

High-Performance Tubular Gel Battery

This 12V 150Ah maintenance-free tubular GEL battery is engineered for reliability in demanding environments. Featuring advanced tubular plate technology, it resists corrosion and prevents the loss of active materials for a long service life. Its robust design is ideal for renewable energy, telecommunications, and heavy-duty UPS applications.

Key Performance Metrics

Maintenance-free

Operating Temperature

-40 to 60

Applications

Recommended Applications

- Renewable energy (solar/wind)
- Communication base stations
- Radio and cellular relay stations
- Large UPS and computer back-up
- Conventional power stations
- Railway signalling
- Buoy lighting
