Product Overview

Reliable Power for Electric Mobility

This 12V 20Ah sealed lead-acid battery is specifically engineered for electric bicycles, offering a dependable and maintenance-free power solution. Designed for robust performance, it ensures consistent energy delivery for daily commuting and demanding electric vehicle applications. With its compact form factor and adherence to international quality standards, this battery provides a reliable choice for professional electric bike assembly and replacement needs.

Technical Specifications

Nominal Voltage

12 V

Voltage

Rated Capacity

20 Ah

Capacity

Model Number

6-DZF-20

Battery Type

Sealed Lead-Acid

Physical Dimensions
