

12V 30A Automotive Relay

This automotive relay is compact and reliable, designed for various vehicle applications. With a 12V coil voltage and a 30A contact rating, it is suitable for switching circuits in automotive electrical systems.

Product Overview

Compact Automotive Power Relay

The YL399 is a robust and reliable automotive relay designed for high-performance vehicle electrical systems. With a standard 12V coil voltage and a 30A contact capacity, it is engineered to safely switch heavy-duty circuits. This component is ideal for demanding applications including automotive lighting control, cooling fans, and electric pumps.

Technical Specifications

Rated Current

30 A

Rated Current

Coil Voltage

12 V

Suitable Applications

Automotive Lighting, Cooling Fans, Electric Pumps, Circuit Switching

Model Identifier

YL399-A-12V-R
