

12V 40Ah Lead-Acid Automotive Battery

This is a 12V 40Ah lead-acid battery designed for starting or automotive applications. It features multiple filler caps on the top for electrolyte maintenance.

Product Overview

Reliable Starting Power

This 12V 40Ah lead-acid automotive battery is engineered for consistent starting performance in various automotive applications. Featuring a robust design with accessible filler caps for electrolyte maintenance, it offers a practical and durable solution for vehicle power needs. Its compact 6QA-40-1 architecture ensures compatibility with standard automotive battery compartments.

Technical Specifications

Performance Metrics

12 V

Voltage

40 Ah

Capacity

Rated Voltage	12 V
Rated Capacity	40 Ah
Model Number	6QA-40-1

Design & Features

Maintenance Type

Accessible Filler Caps • Lead-Acid

Primary Application	Automotive, Starting Power
