

12V 45Ah Starting Lead-Acid Battery

This is a 12V 45Ah starting lead-acid battery. It is designed for automotive applications, providing reliable starting power for vehicles.

Overview

Reliable Starting Power

This 12V 45Ah lead-acid battery is engineered specifically for automotive starting applications. Designed to deliver consistent and reliable ignition power, it ensures dependable vehicle performance under various operating conditions. This robust unit is built to meet the demanding requirements of standard automotive electrical systems.

Technical Specifications

Application

Automotive • Starting

Nominal Voltage

12 V

Rated Capacity

45 Ah

Model Number

6QA-45

Technology

Lead-Acid
