Product Overview

High-Performance Automotive Power

This 12V 60Ah sealed maintenance-free lead-acid battery is engineered to provide reliable starting power for automotive applications. Featuring a specialized lead plate design, the unit offers excellent cold cranking capacity and high stability. The robust polypropylene case ensures protection against vibration, while the heat-sealed construction prevents electrolyte leakage for a long operational lifespan.

Technical Specifications

Voltage	12 V
Capacity	60 Ah

Physical Dimensions

Dimensions (mm)

Length	Width	Height	Total Height
258	173	200	220

Performance Features

Vehicle Compatibility

- Automotive engines
- Japanese vehicle standards

Key Characteristics

Sealed Maintenance-Free, Anti-acid, Anti-shake, Cold Resistance, High Stability
