

12V 60Ah Enhanced Flooded Car Battery for Start-Stop Vehicles

This 12V 60Ah Enhanced Flooded Battery (EFB) is designed for start-stop vehicles. It provides high power and a long PSOC (Partial State of Charge) cycle life, supporting faster charging capabilities.

Product Overview

Enhanced Flooded Battery (EFB) Technology

This 12V 60Ah Enhanced Flooded Battery is engineered specifically for vehicles equipped with start-stop technology. It features advanced EFB construction that delivers high power output, improved charge acceptance, and an extended partial state of charge (PSOC) cycle life. Designed for reliability and performance, this battery supports green power initiatives through faster charging capabilities and robust construction suitable for demanding automotive applications.

Technical Specifications

Voltage	12 V
Capacity	60 Ah
Battery Technology	Enhanced Flooded Battery (EFB)

Key Features

Performance Highlights

100 % High Power Output	100 % Faster Charging
-----------------------------------	---------------------------------

Benefits

- Optimized for Start-Stop vehicles
- Long PSOC (Partial State of Charge) cycle life
- Enhanced charge acceptance
- Green power support

Compliance & Safety

Composition	Lead (Pb), Recyclable
-------------	-----------------------
