

12V 60Ah Lead-Acid Car Battery

This is a 12V 60Ah lead-acid car battery. It is designed for automotive applications.

Overview

Reliable Automotive Power

This 12V 60Ah lead-acid battery is engineered for consistent automotive performance. Designed with a standard form factor, it provides the necessary cranking power and capacity for reliable vehicle starting and electrical support. Built for durability, this unit is a practical solution for general automotive maintenance and replacement needs.

Technical Specifications

Rated Voltage

12 V

Voltage

Rated Capacity

60 Ah

Capacity

Battery Chemistry

Lead-Acid

Maintenance

Flooded / Accessible (Requires water level maintenance)

Key Features

Design Characteristics

Standard Terminal Layout • Accessible Caps • High-Visibility Top

Primary Applications

Automotive, Starting, Lighting, Ignition
