

12V 7Ah VRLA Battery

This valve regulated lead acid (VRLA) battery is designed for both standby and cycle use. It operates at 12V with a 7Ah capacity.

Product Overview

Versatile Power Solution

The model 6FM7 is a high-performance Valve Regulated Lead Acid (VRLA) battery engineered for reliable power delivery. With a 12V voltage and 7Ah capacity, this unit is designed to support both standby and cycle-use applications efficiently. It features a robust design that prioritizes safety and regulatory compliance, making it an ideal choice for professional energy requirements.

Technical Specifications

Nominal Voltage	12 V
Capacity	7 Ah
Maximum Charging Current	0.3C10 (C = Ah value of rated capacity)

Charging Guidelines

Charging Voltage Requirements

Application Type	Voltage Range (V)
Standby Use	13.50 - 13.80
Cycle Use	14.50 - 14.80

Compliance & Safety

Safety Cautions

- Do not short circuit the battery terminals
- Do not charge in a sealed container
- Do not incinerate

Regulatory Standards	CE, RoHS
----------------------	----------
