

12V Automotive Battery

This 12V battery is designed for automotive or industrial applications. It features a robust construction with fluid level indicators.

Overview

Reliable 12V Automotive Power

This 12V automotive battery is engineered for consistent performance in automotive and industrial applications. Featuring a robust design with clearly marked maintenance access points, it ensures ease of use and long-term reliability. The casing includes integrated fluid level indicators, allowing for quick visual checks to maintain optimal operation.

Technical Specifications

Rated Capacity

36 Ah

Capacity

Maintenance Type

Accessible Caps • Fluid Level Indicators

Nominal Voltage

12 V

Design & Construction

Casing Features

- Robust construction
- Yellow top cover
- Blue maintenance caps
- Fluid level markings (Upper/Lower)
