

12V Brushless 660LPH 7M Submersible Water Pump

This 12V brushless water pump features a magnetic drive system and is submersible. With a flow rate of 660 liters per hour and a maximum head of 7 meters, this pump is suitable for demanding tasks.

Product Overview

High-Efficiency Submersible Pump

This 12V brushless DC water pump is engineered for reliable and efficient fluid transfer in diverse applications, including CPU cooling and small water features. Its magnetic drive system ensures quiet operation and long-lasting performance, while the compact design allows for easy integration into space-constrained systems. Built for energy efficiency, this pump provides stable flow rates suitable for continuous use.

Technical Specifications

Model Number	WIN-140505
Rated Voltage	12 V
Voltage Range	5-14 V
Max Load Current	1 A

Performance Metrics

Key Performance Metrics

520 L/H

Max Flow Rate

5 m

Max Static Lift

14.4 W

Power Consumption

Features

Recommended Applications

- CPU Cooling Systems
- Small Fountains
- General Fluid Transfer
- Water Circulation Systems

Key Features

Brushless DC Motor, Magnetic Drive, Submersible, Compact Design, Energy Efficient
