

12V Cordless Lithium-Ion Drill Driver

This compact 12V lithium-ion drill is designed for drilling and screwdriving tasks. It features adjustable torque and variable speed for precise control.

Product Overview

Compact Power and Precision

This 12V Cordless Lithium-Ion Drill Driver is engineered for versatility and ease of use in light-duty applications. Featuring an ergonomic design with an overmold handle, it ensures user comfort during extended operation. With adjustable torque settings and a variable speed trigger, this tool provides the precision required for a wide range of screwdriving and drilling tasks.
