

12V Cordless Metal Shear

This 12V cordless metal shear is designed for cutting various types of metal with precision. It features a durable cutting head with hardened steel blades for cutting sheet metal, aluminum and other materials.

Product Overview

High-Performance Cordless Metal Shearing

This 12V cordless metal shear is engineered with a sensorless, brushless permanent magnet motor for enhanced durability and efficient operation. Designed for versatility, it features chrome-vanadium alloy steel shears capable of handling steel, iron, and aluminum plates with precision. With a mechanical two-speed transmission and variable speed control, this tool offers the flexibility required for professional metal fabrication and HVAC applications.

Technical Specifications

No-load Speed

1400 r/min

High Speed

400 r/min

Low Speed

Battery Voltage	12 V
Battery Capacity	1500 mAh
Quick Charge Time	1 h
Max Cutting Thickness	1.8 mm

Key Features

Design Highlights

Brushless Motor • Soft Grip Handle • Variable Speed • Mechanical Two-Speed

Compatible Materials	Steel Plate, Iron Plate, Aluminum Plate
----------------------	---

Logistics

Export Carton Specifications

Metric	Value
Carton Size	675x445x290mm
Gross Weight	26.5 kg
Net Weight	25.5 kg
Sales Unit	10 pcs

Container Loading Capacity

- 2374 pcs (20ft)
- 4748 pcs (40ft)
- 5843 pcs (40HQ)
