Product Overview

Reliable Fuel Shut Off Control

This fuel shut-off solenoid valve is engineered for precise control of fuel supply to the engine, ensuring efficient and reliable operation. Designed for compatibility with specific heavy-duty applications, it features a robust construction and a secure threaded base for installation. The unit is pre-wired with a three-wire harness and connector, facilitating straightforward integration into existing electrical systems.

Technical Specifications

Electrical Interface

- 3-wire harness (Red, White, Black)
- Integrated connector

Operating Voltage	12 V
Part Number	30A87-00060

Commercial Terms

Warranty

1 Year Warranty

Stock Status	In Stock - Fast Delivery
