

12V DC Motor for Industrial Machinery

This is a high-performance 12V DC motor suitable for various industrial and general machinery applications. The motor features a robust construction and is engineered for reliable operation.

Product Overview

High-Performance 12V DC Motor

This high-performance 12V DC motor is engineered for reliable operation in a variety of industrial and general machinery applications. With a robust construction, it is designed for integration into custom equipment requiring precise and efficient power delivery. It offers a consistent speed of 2100 RPM, making it a dependable choice for demanding mechanical tasks.

Technical Specifications

Rated Speed

2100 RPM

Rated Speed

Rated Voltage	12 V
Model Number	78ZY116-2712
Typical Applications	Industrial Machinery, Custom Equipment, General Machinery
